Once I swore I'd shun women whose driving was poor; I at raspers of gears looked askance. No lady who spun the rear wheels at a start With me had a ghost of a chance.

On a girl who permitted her motor to knock While ascending a tortuous grade I would bend a reproving and censuring frown; Oh, I never could love such a maid!

When I first met Eileen I was filled with delight-Her driving was clever and keen. She never once started with hand-brake half on, Oh, my heart went right out to Eileen.

On the hills her declutching was perfectly smooth As she dropped into second from high, But I'll soon have to break with the girl, for I've found She can shift gears much better than I.

### School Children Of U.S. Unite to Help Red Cross

22,000,000 Pupils Will Raise Mrs. Morgenthau 25 Cents Each for Mercy Work

The 22,000,000 school girls and boys n the United States will be organized into a Junior Red Cross, it was an nounced yesterday by Henry P. Davison, chairman of the Red Cross War Council. The organization has already vancement and glory of the nation. No mill and Smelter Workers, affiliated man in this rough community, set in the midst of jagged ridges and peaks too, but was able to collect only the midst of jagged ridges and peaks too, but was able to collect only to the midst of jagged ridges and peaks too. too, but was able to enlist only 2,500 men. The irritation caused in this free-and-easy heterogeneous community by the draft law was put to advantage. manufacture the medical supplies so badly needed abroad.

Membership in the Junior Red Cross to be by schools. Whenever there For a time it looked as if there might At the same time every pupil will be

less now.

Men began to drift back to work.
The glistening bayonets of the soldiers assured them protection. In a little while 80 per cent of the mine workers were on the job again and mine production soon increased to 50 per cent of normal.

See less Men's Union in the mense amount of supplies which the

normal.

Then the Smeiter Men's Union in the great Anaconda smelter became the tool of the I. W. W. They tore up the scrap of paper that represented their contract with "the company" and quit in a body. The electricians, in part, also yielded to the agitators, violated their contract and quit work in the mines. The smelters were forced to shut down, the mines couldn't run without the smelters and without the electricians. So the industrial trouble that seemed about to end became last week worse than ever. How the I. W. W. Work

Having put the mines out of busiss the I. W. W. are now seeking to
errun and demoralize all the various desorganizations and the various desorganization and the vari

overrun and demoralize all the various trades organizations affiliated with the American Federation of Labor, hoping thus to add to their ever boiling pot of New York State alone last spring made over 40,000 articles during the last few weeks of the achool year for the Red

in all trades.

Carpenters getting \$5 a day are stirred up to strike. Plasterers at \$6 are told that they are industrial slaves. Plumbers at \$8 a day are persuaded Plumbers at 58 a day are persuaded that they are downtrodden.

As for the miners and muckers, they were getting \$5.25 daily for eight hours when they struck, and had enjoyed three increases of pay within a year, according to a sliding scale, based on the price of copper. They asked for \$6 a day, dismissal of the state mining inspector, improved safety conditions in the mines and the abolitics of the "grating card". vocational education for girls in the state, says that in many cases she was told that their work was, if anything, better than that in the adult work."

Women Who Gave Men For War Form Society ion of the "rustling card." Congresswoman Jeannette Rankin has To Help Cause at Home

congresswoman Jeannette Ransin has given the rustling card national fame. It is simply a system whereby "the company" issues to suitable applicants a card entitling them to consideration when applying for work at the different mines. To get this card the applicant has to give certain information about his nast and his domestic applicant has to give certain information about his nast and his domestic applicant has to give certain into about his past and his domestic relations. The company checks up this information, and if the applicant is not found satisfactory he is refused a rustling card, which practically means that there is no place for him in Butte. Men Resent Inquiries

The men resent this inquiry into their records, with its consequent restriction of full freedom of employment. When a man gets employment he gives up his card. If he quits or is discharged he gets a new one, but not more than two cards are issued to any one man in a month.

The National War Aid Society, which has its headquarters at 1606 Twentieth Street. N. W. Washington, was formed primarily in answer to Gen-

ganization credit for having struck the United States a harder blow than Germany has yet given it.

Tragedy Started Trouble

The trouble began when 172 men were asphyxiated in consequence of a fire in the North Butte mine on June 8, though this is not a "company" mine 8, though this is not a "company" mine 8, though this is not a "company" mine 9, though of the dangers that be set them in their work. It reopened the wounds of old labor troubles and brought to a head long repressed agitations for better pay and better working conditions.

The miners, worked upon by unserupulous agitators, felt in a blind sort of way that their dead called upon them to be avenged. For three years "The Company" had had its own way with the miners proper. The miners unions had quarrelled among themselves and with "The Company," and had gone to pieces, although most other trade unions, in or out of the mines, became stronger than ever.

So, though lacking an organization, so, though lacking an organization, the miners and muckers—or part of the miners and muckers—or part of them—struck without warning on June 19 Maybe Judge Covington, the Presiments and it is a many the first trial. But the strike is more than that. In this hour of universal patriotic effort it is a national disgrace that a commodity so necessary to the weign of war as copied with "The Company," and had gone to pieces, although most other trade unions, in or out of the mines, became stronger than ever.

So, though lacking an organization, the miners and muckers—or part of the miners and muckers—or part of them struck without warning on June 19 Maybe Judge Covington, the Presiments and a the rusting cand it is that they frequently abused their power in a most arbitrary and that they frequently abused their power in a most arbitrary and that they frequently abused their power in a most arbitrary and that they frequently abused their power in a most arbitrary and the trusting cand it is the original and other undesirable men can be kept out of the mine and other undesi
